

**More dads who respect life.** Our men's program relaunch in the first quarter of 2025 is having a tremendous impact, as illustrated by the following story:

Two couples gave our staff similar accounts of their fathers' responses to the couples' abortion plans. Both dads were compelling in their conviction that abortion was not the answer. One confessed to the deep grief and regret he continues to feel years after the abortion he was a part of took place. The sincerity and candor of their fathers convinced both couples to choose life for their babies.

**More parents receiving education and training on car seat safety.** Over the past three years **2,068 clients** have received education, car seat instruction and even car seat installation at our centers.

A client who had attended our car seat safety class and learned about proper car seat installation was later involved in a head-on car crash. All four airbags deployed and the car was totaled. Her baby son in the back seat escaped without a scratch. His car seat saved him.

Imagine more... *Life*

## The Impact Report

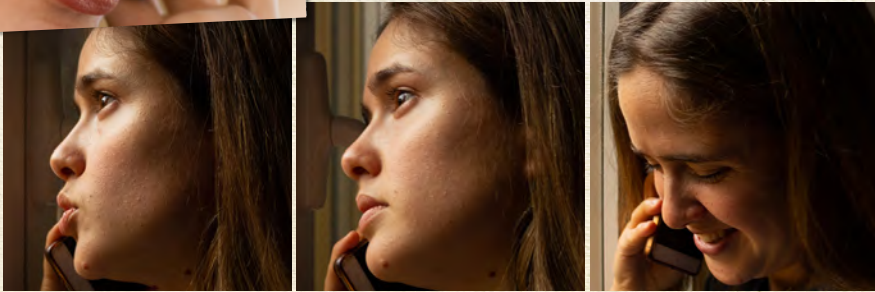

August 2025

**Imagine more life.** As a non-profit, faith-based, alternative to abortion organization, The Life Center imagines more life for our communities because of our belief in and hope for the people and communities we serve.

We educate from a foundation of faith. Our staff believes the word of God, values people and treats them with kindness and respect. By these simple acts, we see more positive outcomes for our clients as we help them learn to make productive decisions for their lives.

The following statistics and stories are examples of the impact we have on the lives of our clients and their communities.

**More decisions for life.** Moms and dads feel heard, valued and appreciated, and are more receptive to the education we offer as a result. Since January 2024, **1,360 moms** chose life for their unborn child.

A young woman called asking for abortion information. The receptionist who answered took the time to listen to her story and the circumstances leading her to consider abortion. She then patiently guided the young woman through the life-affirming options The Life Center offers: all the support services available through pregnancy and beyond if a mom chooses to parent, and referrals if she chooses adoption. At the end of the call, the young woman made an appointment for a pregnancy test. When asked at the appointment if she still intended to pursue an abortion, the young mom emphatically stated,

“Oh no, after I talked with the nice lady on the phone and thought about everything she said, I’m planning to parent!”

**More desire for prayer.** Prayer is one of the services we offer to clients at their request. **Nearly 550 moms and dads** received prayer at The Life Center over the past year.

A young mom came in asking if someone would pray with her. She told us that she had been urged to abort her unborn child because there had been so much tragedy in her life, and that life would finally be easy if she just “got rid of it.”

“How could I have an easy life facing God one day, knowing I killed His child? Besides, my daughter gives me endless joy and purpose every day.”
